Mr. Frank Laird
Environmental Engineering Dept.
The Anaconda Company
Hennessy Building
Butte, Montana 59701

Dear Frank:

Enclosed is a Xerox copy of a new booklet titled "Environmental Pollution by Fluorides in Flathead National Forest and Glacier National Park" published by the Forest Service just last month. The study is concerned with fluoride emissions from the Anaconda aluminum plant at Columbia Falls, Montana.

You are probably already aware of this publication but I am bringing it to your attention just in case it may not be generally available as yet.

With best regards.

Yours very truly,

W. J. Garmoe
